1 Executive Summary

PHIN is publishing information about Never Events based on data received from UK private providers, as required by [the Competition and Markets Authority Private Healthcare Market Investigation Order 2014 \(as amended\)](#).

The publication of this information represents only one dimension of the wider work of PHIN in reporting outcomes from UK private healthcare facilities¹.

Never Events have been routinely monitored and reported in the NHS to help protect patients from avoidable harm by increasing opportunities to learn from events where things go wrong. The Able to publish Never Events for privately funded healthcare contributes to this data and therefore increases the opportunities for learning and service improvement.

PHIN aligns its methods with those of NHS Improvement, who publishes identical information for NHS organisations².

PHIN's Never Event measure on the public facing website have only been produced for provider sites where a site has submitted twelve, monthly adverse event data sets within the reporting period **1st April 2019 to 31st March 2020**. However, this document contains Never Event data for sites who have not submitted twelve monthly adverse event data sets but do have Never Events which have occurred in the period. This document also separately identifies those sites who did not have twelve submissions or were not of sufficient quality to enable publication.

The implications of this for individual provider sites, in terms of measure publication, is summarised below in Table 1: Count of private provider sites by measure publication status (1st April 2019 to 31st March 2020) .

¹ Any facility providing privately-funded healthcare services on an inpatient, day-case and/or outpatient basis, and may include a NHS Private Patient Unit.

² The CMA Order does not cover mental health facilities and therefore one Never Event relating to inpatient mental health facilities is not published by PHIN.

Table 1: Count of private provider sites by measure publication status (1st April 2019 to 31st March 2020)

Publication status	Number of Sites
Able to publish Never Events²	272
Unable to publish - insufficient adverse event data supplied	358
Total¹	630

* This represents approximately 85% of the market by activity volume.

Table 2: The count of Never Events reported by private provider sites during the reporting period 1st April 2019 to 31st March 2020, below lists the type of Never Event with the count of each type.

Table 2: The count of Never Events reported by private provider sites during the reporting period 1st April 2019 to 31st March 2020

Type of Never Event	Count of Never Event for provider sites submitting Adverse Event data returns for all 12 months of the reporting period	Count of Never Event for provider sites submitting Adverse Event data returns for fewer than 12 months of the reporting period*
Medication	1	0
Surgical	23	0
General	0	0

* These Never Events will not be included in the figures published on the public facing website as they were reported by provider sites that failed to supply PHIN with 12 months of Adverse Event data. Mental Health Never Events are not included in PHIN's publication as the CMA Order does not cover mental health facilities.

2 Introduction

All providers of admitted, privately-funded healthcare in the UK are required by the Competition and Markets Authority Private Healthcare Market Investigation Order 2014 (*as amended*) to submit data on activity, safety and quality to the Private Healthcare Information Network (PHIN).

The Order also requires PHIN to publish this data on a public web site in the form of performance measures. This report describes the publication for one of those measures – Never Events. The results cover the reporting period **1st April 2019 to 31st March 2020**.

Never Events have been routinely monitored and reported in the NHS to help protect patients from avoidable harm by increasing opportunities to learn from events when things do go wrong. The ability to publish Never Events for privately funded healthcare contributes to this data and therefore increases the opportunities for learning and service improvement.

2.1 Time series analyses

In due course, as PHIN publishes data for more time periods, these measures will be available as a time series which can indicate changes in hospital performance over time.

2.2 Notes on the provisional nature of the data

The information contained in this report is based on data submitted by private providers to PHIN on or before the 3rd November 2020, this being the cut-off date for data submissions for this reporting period (**1st April 2019 to 31st March 2020**). As additional data may subsequently be submitted by providers, all data must be considered provisional and subject to change in subsequent publications and updates.

The Never Event measures published on PHIN's public-facing website are only for provider sites that have submitted twelve months of adverse event data within the whole of the reporting period. However, this report also includes Never Event measure information for sites which have not submitted twelve months of adverse event data but, nonetheless, have reported some Never Events in the period. This report also separately identifies those sites which do not have twelve months of adverse event data (see Appendix A – Breakdown of Never Event publication status by private provider site).

3 PHIN’s ability to publish Never Events

3.1 Criteria

For the purposes of measure publication each reported Never Event (in the form of an Adverse Event record) must be linkable to the corresponding Admitted Patient Care (APC) patient record in which the Never Event occurred.

As a result, sites fall into one of two publication statuses depending on the completeness and quality of their Adverse Event and APC data submissions. These are:

- 1) **Able to publish Never Events:** This is where a provider site has:
 - a) Positively reported either none or at least one Never Event for each of the twelve months of the reporting period.
 - b) Has submitted APC data containing the linked records for each of the corresponding adverse event records.
- 2) **Unable to publish - insufficient adverse event data supplied:** This is where a provider site has either provided none or only partial (missing months) adverse event data for the reporting period.

These organisations are not meeting their legal obligations under the CMA Order.

Table 3: Number of provider sites by sector type and publication status (1st April 2019 to 31st March 2020) (IND = independent provider; NHS PPU = NHS Private Patient Unit)

Sector	Publication Status (as per description above)	Number of Sites
IND	Able to publish Never Events	213
IND	Unable to publish - insufficient adverse event data supplied	115
NHS PPU	Able to publish Never Events	59
NHS PPU	Unable to publish - insufficient adverse event data supplied	243
Total ³		630

A detailed breakdown of publication status by provider sites is available in Appendix A – Breakdown of Never Event publication status by private provider site.

³ This represents the total number of sites that are active as of the produced date or had submitted data for the reporting period.

4 Rules and caveats to the published measures

There are a number of rules and caveats associated with the data that PHIN uses for measure publication based on how the data are provided to PHIN. These must be considered when exploring the Never Event measure to ensure they are interpreted correctly.

4.1 Never Event rules and caveats

Table 4: Rules and caveats applicable to Never Events

Summary	Technical detail (where needed)
General notes	
<p>PHIN will be publishing the following counts for Never Events as defined by NHS Improvement:</p> <ul style="list-style-type: none"> ○ Total Number of Never Events ○ Never Event by category 	<p>Never Events are not procedure specific. They will be published at hospital level only.</p>
Data publication considerations	
<p>Adverse Events records must link to a valid APC record to be included for publication.</p>	<p>Each Adverse Event and APC record should include matching values in the PROVIDER, PROVSPNO and EPIORDER fields. This enables each record to be linked and the records validated with respect to each other. If it is not possible to link these records together, we are not able to validate, and is therefore not published.</p>
<p>The Never Events are based on data that are submitted directly by private providers to PHIN. The CMA Order places a legal requirement on these organisations to provide PHIN with information that is “sufficiently detailed and complete” for PHIN to be able to publish accurate information.</p>	<p>PHIN publishes information on the assumption that providers have submitted all records needed for publication and none have been withheld.</p> <p>Where a provider has submitted data to PHIN about a particular type of adverse events in a given month but has not included information about any other adverse event types, this is interpreted as there having been no other adverse events for this month.</p> <p>For example, if a provider reported only a single Never Event and no others in their January submission, this would be taken to</p>

	mean that there had only been the one stated event in that one-month period.
The measures will be published in line with the current PHIN reporting period.	<p>Only Never Events reported to PHIN which have an EVENT_DATE falling within the relevant reporting period are published.</p> <p>Any data submitted after the PHIN data freeze date will not appear in the current reporting period publication (even if it relates to events or activity during the reporting period). This data may appear in future publications or updates.</p>
<p>Information will only be published for provider sites that have submitted complete Adverse Events data for the current PHIN reporting period.</p> <p>Any site that has not submitted complete data will be reported as having submitted 'Insufficient data'.</p>	<p>Data is deemed to be complete based on the EVENT_DATE of all adverse events reported to PHIN by the private provider.</p> <p>Data are deemed to be complete if a provider has:</p> <ul style="list-style-type: none"> • Submitted at least one adverse event (of any kind) with an EVENT_DATE occurring in a particular month; OR • Has submitted a null return for the month without any other events reported; AND • Has made either of the above submissions for every month occurring with the reporting period. <p>Note: if conflicting positive events and a null return are received for a given month, the null return is disregarded.</p>
Data validations	
All Adverse Event records must link back to a valid APC record.	Each Adverse Event and APC record for the same patient should include matching values in the PROVIDER, PROVSPNUM and EPIORDER fields. This enables each record to be linked and the records validated with respect to each other. If it is not possible to link these records together the Adverse Event data is deemed to be invalid and is not published.

<p>Only information relating to private patients is published. This comprises privately funded care in both independent sites and NHS PPUs and excludes NHS-funded care.</p>	<p>Only Adverse Events records that link to APC records where ADMINCAT= 2 (private) are included.</p>
<p>PHIN does not currently publish any information based on APC records containing any of a list of proscribed procedures and diagnoses, which NHS Digital has deemed “sensitive”. This is in line with NHS Digital policy. This means that if an APC record associated with an Adverse Event contains one of these codes the Adverse Event information will not be included for publication.</p>	<p>NHS Digital 2016: Submitting Anonymous and Sensitive Records to SUS</p>
<p>PHIN does not publish information relating to mental health.</p>	<p>Mental health activity is excluded from the CMA Order. Private providers of mental health care do not send information to PHIN and therefore Never Event data relating to mental health inpatient care is not published by PHIN.</p>
<p>PHIN does not publish information relating to outpatient activity.</p>	<p>Outpatient activity is excluded from the CMA Order. Private providers do not send outpatient information to PHIN.</p>

5 Results – Never Events

5.1 Definition

NHS Improvement definition of Never Events

Never Events are patient safety incidents that are wholly preventable where guidance or safety recommendations that provide strong systemic protective barriers are available at a national level and have been implemented by healthcare providers.⁴

Never Events are an indicator of facility specific quality and adherence to safety standards set nationally as well as being a record of facility specific clinical outcomes. The occurrence of a Never Event is a failure of process to ensure patient safety.

Although a Never Event occurring may not result in harm to a patient, all must be investigated. NHS improvement has set out a defined list of [Never Events](#) and all hospitals are required to report them.

Table 5: Categories of Never Events and details of the type of incident

Category of Never Event	Never Event ⁵
Surgery	Wrong site surgery
Surgery	Wrong implant/prosthesis
Surgery	Retained foreign object post procedure
Medication	Mis-selection of a strong potassium solution
Medication	Administration of medication by the wrong route
Medication	Overdose of insulin due to abbreviations or incorrect device

⁴

https://improvement.nhs.uk/documents/2265/Revised_Never_Events_policy_and_framework_FINAL.pdf

⁵ Undetected oesophageal intubation is not included in this list, as per [NHS improvement's Never Events list](#) it is temporarily suspended as a Never Event

Category of Never Event	Never Event ⁵
Medication	Overdose of methotrexate for non-cancer treatment
Medication	Mis-selection of high strength midazolam during conscious sedation
General	Falls from poorly restricted windows
General	Chest or neck entrapment in bed rails
General	Transfusion or transplantation of ABO-incompatible blood components or organs
General	Misplaced naso- or oro-gastric tubes
General	Scalding of patients
General	Unintentional connection of a patient requiring oxygen to an air flowmeter

One additional Never Event as defined by NHS Improvement, Failure to install functional collapsible shower or curtain rails, is excluded from the list by PHIN as it is only applicable to mental health settings and these are not covered by the CMA Order.

5.2 Importance of reporting of Never Events

Failure to report a Never Event is unacceptable and can signal cultural and safety failings in an organisation.⁶

NHS Improvement Never Events Framework⁷

The reporting and investigation of Never Events may be an indicator of the organisation's attitude to patient safety and openness to learn from mistakes that have been made and to make changes to ensure they do not happen again.

5.3 PHIN's Able to publish Never Events

PHIN is publishing the same Never Events data as collected by NHS Improvement using the same definitions of Never Events for each subtype as used in the NHS Improvement data collection. These are outlined below.

Table 6: Never Events based on provider sites submitting complete adverse event data(1st April 2019 to 31st March 2020). only contains data for sites falling into publication category 1, (Publication of counts of Never Events).

Table 6: Never Events based on provider sites submitting complete adverse event data(1st April 2019 to 31st March 2020).

Never Event ⁸	Number of events
Wrong site surgery	7
Wrong implant/prosthesis	9
Retained foreign object post procedure	7
Mis-selection of a strong potassium solution	0
Administration of medication by the wrong route	0
Overdose of insulin due to abbreviations or incorrect device	1
Overdose of methotrexate for non-cancer treatment	0
Mis-selection of high strength midazolam during conscious sedation	0
Falls from poorly restricted windows	0
Chest or neck entrapment in bed rails	0
Transfusion or transplantation of ABO-incompatible blood components or organs	0
Misplaced naso- or oro-gastric tubes	0

⁸ Undetected oesophageal intubation is not included in this list, as per [NHS improvement's Never Events list](#) it is temporarily suspended as a Never Event

Never Event ⁸	Number of events
Scalding of patients	0
Unintentional connection of a patient requiring oxygen to an air flowmeter	0

Table 7: Never Event by provider site and Never Event type for sites who have reported at least one Never Event. (1st April 2019 to 31st March 2020).

6 Appendix A – Breakdown of Never Event publication status by private provider site

In Table 9, Sector refers to the two principal types of private healthcare facilities falling under the remit of the CMA Order:

- IND (independent hospitals): means organisations providing care that is paid for in a number of ways, including self-funding by patients, through private and company medical insurance arrangements, or directly commissioned by NHS organisations and clinical commissioning groups.
- NHS PPU (NHS Private Patients Units): means a private patient unit, which is a facility within a national health service providing inpatient, day-case patient or outpatient privately-funded healthcare services to private patients; such units may be separate units dedicated to private patients or be facilities within a main national health service site which are made available to private patients either on a dedicated or non-dedicated basis;

Table 9: The publication status of provider sites by provider/Trust and sector

Provider	Site	Sector	Publication status
152 Harley Street	152 Harley Street	IND	Unable to publish measure - insufficient adverse event data
Abertawe Bro Morgannwg University Health Board	Princess of Wales Hospital	NHS PPU	Unable to publish measure - insufficient adverse event data
